EDUCATION

Texas A&M University | College Station, TX
Bachelor of Science in Computer Science
Minors: Mathematics, Engineering Project Management

May 2028
GPA: 3.68/4.0

SKILLS

Languages: C#, TypeScript, JavaScript, Python, C++, Java, SQL, HTML/CSS, Haskell
Frameworks/Libraries: .NET, Angular, React, Next.js, Tailwind CSS, Prisma, NextAuth, OData, Entity Framework
Databases/Tools: PostgreSQL, SQL Server, Git/GitHub, Vercel, Figma
Spoken Languages: English, Spanish

TECHNICAL EXPERIENCE

PricewaterhouseCoopers (PWC) | Dallas, TX
Incoming Software Engineer Intern

Summer 2027

Frogslayer | College Station, TX
Junior Software Engineer | C#, Angular, TypeScript, SQL

Aug 2026 - Present

PowerDB | College Station, TX
Part-Time Software Engineer | C#, Angular, TypeScript, SQL

May 2026 - Aug 2026

- Diagnosed and resolved defects in a C#/.NET WinForms importer that parses electrical test data into SQL Server, adding null-safe validation around the Entity Framework data context to prevent unhandled import exceptions.
- Developed a full-stack feature across an Angular/TypeScript front end and C# OData API, enabling users to override default compliance test intervals and persist custom values to SQL Server for dashboard use.

Society of Hispanic Professional Engineers (SHPE) | Texas A&M University
Website Development Lead | Next.js, TypeScript, TailwindCSS, React

May 2025 - May 2026

- Architected and maintained a central web platform serving **500+** active members, implementing UI/UX optimizations that increased site accessibility and boosted user engagement by **90%**.
- Spearheaded weekly technical workshops to onboard **10+** new contributors, providing hands-on instruction in codebase architecture, Git version control, and agile development workflows.

PROJECTS

SHPE Connect | Next.js, TypeScript, PostgreSQL, Prisma, NextAuth, Vercel

- Designed and developed a full-stack member networking platform for the Texas A&M SHPE chapter, featuring authentication, role-based access control, member profiles, and a searchable directory.
- Built the application with Next.js, Prisma, and PostgreSQL, deploying on Vercel and integrating protected routes for member-only access.

Terminal Home | Python, Textual, tmux, pytest, GitHub Actions

- Built a keyboard-driven terminal workspace manager that discovers projects, creates configurable tmux environments, and persists layouts for safe session recreation across WSL restarts.
- Designed typed workspace models and fault-tolerant tmux orchestration with stable pane/window identifiers, supported by 302 automated tests and CI validation across Python 3.10 and 3.12.

LEADERSHIP & TEACHING EXPERIENCE

Engineering Peer Teacher | Texas A&M University
Student Assistant | Python, Matplotlib, NumPy

August 2025 - May 2026

- Mentored **60+** students per week in introductory engineering computation, helping students debug Python programs and develop foundational programming and problem-solving skills.

Engineering Summer Bridge Program | Texas A&M University
Student Mentor | Python, NumPy, Git/GitHub

July 2025 - August 2025

- Mentored four incoming engineering students through a **160-hour** summer program, teaching Python fundamentals, debugging, computational thinking, and Git/GitHub through hands-on technical exercises.
